Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 3, 7, 8, 9, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over De Witt, U. S. Patent 5,388,359 in view of Parent, U. S. Patent 2,530,478. De Witt teaches a sign bracket comprising a frame member 36, 38, and 39 for carrying sign (not labeled) between the panels 39 and 38 and a mounting bracket 10 for removably securing the sign to the top of support. The frame has a post 30 adapted to fit within aperture 26 to provide a means to incremental rotation of the frame. The bracket comprises an inverted U-shaped member and a screw 17 for attachment to the support.

3. Parent teaches bracket members and attachment means for securing the bracket members together to provide engagement with opposed vertical sides of a support by the bracket members. The bracket comprises a first bracket member 1 including an elongate slot 4 and second bracket member 2 including a hole 5 positioned over the elongate slot and a wind nut 7 and bolt 6 positioned through the hole and elongate slot for securing the bracket members together.

4. Parent also teaches a socket joint with a rod/post **C** extending therefrom and a clamp **D** at the end of the rod.

5. It would have been obvious to one having ordinary skill in the art at the time this invention was made to construct the mounting bracket taught by De Witt with the adjustable mounting bracket taught by Parent to provide a means to place the sign bracket on a support of varying widths.

Allowable Subject Matter

6. Claims 4-6 and 10-17 are allowed.

7. Claims 19-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

8. Applicant's arguments with respect to claims 3, 7, and 18 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cassandra Davis whose telephone number is 703-308-2223. The examiner can normally be reached on Monday-Friday 8:00-4:30.
